

## About Niemann

In Eastern Westphalia, located in the heart of the German furniture industry, Niemann is one of the most important suppliers of furniture components and composite panels for interiors and the furniture industry. The family-owned company manufactures with 248 employees worldwide with state-of-the-art technology at the headquarter in PR. Oldendorf and production sites in Czech Republic and South Africa and maintains more subsidiaries in Turkey, South Africa, Poland and India. Due to its unique and wide range of manufacturing, a strong focus on research and development, and last but not least its growing role in a network of innovative customers and qualified suppliers, Niemann considers itself as an integrated system provider for customer-oriented solutions in quality, functionality and design.

In a market environment that foregrounds more and more on mass production and low-cost production, we distinguish particularly the demand of individual and customized products. As a typical supplier of front covers, we are dedicated early to the individual and on-demand delivery of technically and aesthetically high-quality furniture parts in lot size „1“ while at the same focusing on the surface as a central element of the living environment.

## Pianovo Lackmatt

In a furniture world flooded with shiny surfaces, Niemann has applied their expertise to the new product line – Pianovo Matt which meets the current demand for elegant matt surfaces. The luxurious, quiet charisma of Pianovo Matt with its unique gloss level of more or less zero, is characterised by softness to the touch and appearance. The matt surface reflects deliberate understatement and allows much leeway for innovative and modern design. In fact, the design is further enhanced by the Pianovo Matt surface because zero reflection further underlines the clearfurniture form. In addition, Pianovo Matt cries out to be touched so as to be fully appreciated. The patented matt lacquer surface offers a very high scratch resistance and is surprisingly insensitive to problems normally associated with matt surfaces.

Dimensions 2800/2655 x 1030 mm  
 Thickness 10 | 18,5 | 25 mm  
 Substrate MDF

## Pianovo Decors

**Antique**  
 Another accenting finish in the Pianovo family, Pianovo Antique further extends the possible combinations in the interplay with contrasting structures. Pianovo Antique is reminiscent of a fresco painting. The patina in the interplay of the matt or glossy lacquer is seen at its best either over large areas in interior design or as an accent on avant-garde furniture.

**Weave**  
 On the surface, an interplay of contrasting structures. Pianovo Weave is a combination of fabric design with the technical quality of a high gloss finish. The vibrant appearance and architectural silhouette appears as a universal plain colour or as an application with matt or gloss.

Dimensions 2800/2655 x 1030 mm  
 Thickness 10 | 18,5 | 25 mm  
 Substrate MDF

## Polaris

The combination of Polaris surface and the technology of Niemann Zero edge creates furniture fronts in a new dimension of blended ideas and variety. The silky matt surface of Polaris submits to the form of the furniture and emits calm elegance. Processing includes a patented decorative layer below the surface, providing a strong contrast to the formative high light of the furniture front. In the front view there is no joint and no visible edge. This creates harmony with the background color and the rest of the structure. The variety of edge treatments from wood to aluminum offers almost boundless combinations. The surface is an extremely robust layer with innovative resistance to soiling and fingerprints. Suitable for a rich range of applications, including kitchens, store fixtures, commercial and residential furniture.

Dimensions 3050 x 1300 mm  
 Thickness 18,5 mm  
 Substrate Chipboard

## Pianovo Lackgloss

Niemann completes the Pianovo high-gloss lacquer product range in the 10 familiar modern, matching colours with Pianovo Lacquer Gloss. In this patented, multiple-tested process, a thin layer of lacquer is applied to a melamine-coated MDF panel as a texturing primer coat. Thanks to the high-quality lacquer system, the Pianovo Lacquer Gloss surface is very hard-wearing and abrasion-resistant.

In the Pianovo family system of products, the designer has an extremely wide range of options for combining various surface effects, either tone-in-tone or in cleverly contrasting colour combinations.

Dimensions 2800/2655 x 1030 mm  
 Thickness 10 | 18,5 | 25 mm  
 Substrate MDF

## Pianovo Metall

Another milestone in the Pianovo range is the new Pianovo metal finishes - a result of creative and consistent development of a new product: A combination of the familiar Pianovo lacquer finishes and real metal. The spectrum of finishes, with its different colour shades in warm and cold tones, reflects the latest trends and designs in creative furniture making and shopfitting. This gives amazing scope for new and flexible combination options. What's more, the patented finishing process provides high resistance and is remarkably impervious for a matt finish.

Dimensions 2800 x 1220 mm  
 Thickness 10 | 18 | 25 mm  
 Substrate MDF

## Kristall | Kristall Satina

**Kristall**  
 With its unique brilliance and depth, Kristall by Niemann sets a new quality benchmark for high gloss surfaces. Light reflecting on the Kristall surface underlines its own distinctive personality.

**Kristall Satina**  
 In its unique appearance of frosted glass, Kristall Satina extends the successful collection of Kristall gloss. At the same time, Kristall Satina impresses with its surprisingly authentic look and touch of frosted glass and its highlighted and solid looking glass construction.

Dimensions 2800 x 1010 mm  
 Thickness 19 mm  
 Substrate MDF
